Comment on essd-2021-415

Giuseppe M.R. Manzella (Editor)

Editor comment on "Data on zooplankton occurrence and abundance in the Far East seas and adjacent Pacific Ocean waters" by Igor Volvenko, Earth Syst. Sci. Data Discuss., <https://doi.org/10.5194/essd-2021-415-EC1>, 2022

the paper describes data collected during various expeditions made by TINRO and recounted in many papers published in the recent past. Having the data available and homogenized is very useful, the choice of a communication to ESSD is appreciated, but the editor (and the referees) need to access the data in order to evaluate the work done. Please provide the author with your username and password in order to proceed further.
