Community comment on "A Harmonized Global Land Evaporation Dataset from Model-based Products Covering 1980–2017" by Jiao Lu et al., Earth Syst. Sci. Data Discuss., <https://doi.org/10.5194/essd-2021-61-CC2>, 2021

I think this is a nice work presenting a valuable datasets. Potentially, the datasets could be used by hydrological modeling, planning of irrigation, and water resource management.

The work is generally well written. The maintext has been well structured, and the figures are clear and readable.

I believe publication of this work could benefit a broad range of users.
