Referee comment on "AnisoVeg: anisotropy and nadir-normalized MODIS multi-angle implementation atmospheric correction (MAIAC) datasets for satellite vegetation studies in South America" by Ricardo Dalagnol et al., Earth Syst. Sci. Data Discuss., <https://doi.org/10.5194/essd-2022-166-RC5>, 2022

I think the authors have done a good job responding to my comments, and I look forward to seeing this paper published (and working with the data set!).
