Suqin Zhang et al.

Author comment on "Rescue and quality control of historical geomagnetic measurement at SheShan Observatory, China" by Suqin Zhang et al., Earth Syst. Sci. Data Discuss., https://doi.org/10.5194/essd-2022-203-AC1, 2022

We gratefully appreciate for your full affirmation and valuable suggestion on our work.

- Comment: whether the pictures (not pictures) conform to the requirements of the journal board, such as the Chinese menu.

  Replay: Thank for your comment. We will translate all Chinese in the pictures into English in the revised manuscript.

2. Comment: Is a small number of words such as station replaced by observatory? The compare... and... replaced by compare... With? Is the conclusion part agreement replaced by consistence? goal seems to be the plan? Have gap and spike been replaced for lack and peak?

  Replay: Thank you so much for your careful check. We will further carefully check the words and correct them in the revised manuscript.
