Comment on essd-2022-318
Jacopo Pulcinella et al.

Author comment on "Deep-water red shrimp fishery in the Eastern-Central Mediterranean Sea: AIS-observed monthly fishing effort and frequency over four years" by Jacopo Pulcinella et al., Earth Syst. Sci. Data Discuss., https://doi.org/10.5194/essd-2022-318-AC1, 2022

Thanks for the received comments. We made all the suggested minor corrections and edited Fig.1 and Fig.2 accordingly. Given the nature of the issues raised, these were revised directly in the manuscript.

Row #35: The bibliography was intentionally bit outdated as it refers to the date on which vessel positional data became available. Anyway, we added a more recent reference and edited the text into "available only in the last decade".
