Comment on essd-2022-343
Salvatore Marullo (Editor)

Editor comment on "Southern Europe and Western Asia Marine Heat Waves (SEWA-MHWs): a dataset based on macro events" by Giulia Bonino et al., Earth Syst. Sci. Data Discuss., https://doi.org/10.5194/essd-2022-343-EC1, 2022

Dear Authors,

This comment is just to make my point of view known about the value of the paper and its characteristics with respect to the scope and requirements of ESSD. First of all, I would like to say that I too believe this is a good well-written paper, but I am also sorry to say that it does not fit the requirements of ESSD as suggested by referee 1 and confirmed by the editor-in-chief. For this reason, I too suggest submitting the work to another journal, taking into account the very good suggestions of the two reviewers.
