Author comment on "An Update on Techniques to Assess Normal Mode Behavior of Rock Arches by Ambient Vibrations" by Mauro Häusler et al., Earth Surf. Dynam. Discuss., <https://doi.org/10.5194/esurf-2021-36-AC1>, 2021

---

Dear reviewers, Dear Editor,

thank you for your work and your supporting feedback. We especially appreciate the effort of reviewer 1 to scan again the correct version of the manuscript, as there was obviously some initial technical issue with the manuscript transfer process.

We went through your comments. Currently, we do not have other questions and I think we see, where and how we can improve the manuscript. We will provide a point-by-point reply soon.
