Author comment on "Theoretical and numerical considerations of rivers in a tectonically inactive foreland" by Stefan Hergarten, Earth Surf. Dynam. Discuss.,
<https://doi.org/10.5194/esurf-2022-14-AC1>, 2022

Dear Reviewer,
thanks for your constructive and encouraging comments! I am quite happy that all reviewers found the concept of carriers and redistributors useful. I also appreciate the additional references very much, although I am always afraid to pick those results of other studies that are in line with my own results. I have to read these papers thoroughly first, but I think that I can submit a revised manuscript quite soon.

Best regards,
Stefan
