Editor comment on "Theoretical and numerical considerations of rivers in a tectonically inactive foreland" by Stefan Hergarten, Earth Surf. Dynam. Discuss.,  
<https://doi.org/10.5194/esurf-2022-14-EC1>, 2022

---

Dear Dr. Hergarten,

Thank you for submitting "Theoretical and numerical considerations of rivers in a tectonically inactive foreland" to Earth Surface Dynamics. As you have seen, we received three thorough reviews. All three reviews are favorable, recommending different levels of revisions. The reviewers raised important points that require attention, and I would like to see those addressed in the revised manuscript. As some revisions may require additional analysis, I return the manuscript to you for **Major Revisions**. Details regarding the submission process and timeline will be provided separately.

Best, Sagy Cohen
