Referee comment on "Response of modern fluvial sediments to regional tectonic activity along the upper Min River, eastern Tibet" by Wei Shi et al., Earth Surf. Dynam. Discuss., <https://doi.org/10.5194/esurf-2022-34-RC2>, 2022

---

Thanks for your careful revisions and modifications on the early version of the manuscript. I have no further comment on this well-revised manuscript, which can therefore be accepted as it is now.
