Comment on esurf-2022-61

Martha Cary Eppes et al.

Author comment on "Standardized field methods for fracture-focused surface processes research" by Martha Cary Eppes et al., Earth Surf. Dynam. Discuss.,
<https://doi.org/10.5194/esurf-2022-61-AC1>, 2022

Dr. Laubach's detailed suggestions and comments are exactly what we were hoping to receive in this public forum. Addressing these comments will strengthen the manuscript and its utility considerably.

Currently, however, a majority of us are at AGU, and/or have school aged children and family that require our undivided attention over the holidays.

We will provide a more detailed response to Dr. Laubach's suggestions - and any other comments received through the end of the year - starting no later than Jan 5, earlier if we are able. We thank you for your understanding and patience with this choice.

Eppes et al.,
