Valeria V. Martinez and Laura F. Serpa

Author comment on "Introduction to teaching science with three-dimensional images of dinosaur footprints from Cristo Rey, New Mexico" by Valeria V. Martinez and Laura F. Serpa, Geosci. Commun. Discuss., <https://doi.org/10.5194/gc-2021-15-AC1>, 2021

We would like to thank Dr. White for her kind comments and very appropriate edits for our paper. We do think the use of 3-D images and digital processing will have a significant impact on geoscience education in the near future.
