Author comment on "Transformation of geological sciences and geological engineering field methods course to remote delivery using manual, virtual, and blended tools in fall 2020" by Jennifer Jane Day, Geosci. Commun. Discuss.,
<https://doi.org/10.5194/gc-2021-18-AC3>, 2021

Thanks very much, Eric, for your thoughtful review and recommendations. I will certainly add a rationale for creating this remote version of the course to set the stage for the manuscript. Specific details about some assessments can also be added, though I will focus on only a few key assessments that relate as best as possible to previous assessments from in-person course offerings and support the declarative statement of the success of the remote offering, and strive to be concise on this aspect of the discussion.
