Author comment on "Magnetic to the Core – communicating palaeomagnetism with hands-on activities" by Annique van der Boon et al., Geosci. Commun. Discuss.,
<https://doi.org/10.5194/gc-2021-41-AC3>, 2022

We thank Dr. Nelson for this great comment. It is fantastic to hear about the success of Rock or Choc in Aotearoa New Zealand, and we would love to see the activities they are designing with the MS2 probes! We agree that the lack of reference to learning outcome 3 could have been because it is considered common knowledge by the participants. We will add this to section 4.1 and fix the typo in the caption of Figure 3.
