Author comment on "Climate Stories: enabling and sustaining arts interventions in climate science communication" by Ewan Woodley et al., Geosci. Commun. Discuss., https://doi.org/10.5194/gc-2022-7-AC1, 2022

Dear Tiziana,

Many thanks for taking the time to review this manuscript. We very much appreciate your efforts and very helpful comments.

We have reviewed all of your comments and we are grateful for these observations, which are logical and which we are happy to address in their entirety. Specifically, we recognise that the manuscript would benefit from clearer signposting to the reader and less repetition of specific statements.

In addition, we are happy to provide further detail on the methodological aspects of the research and we agree that this would be highly beneficial in bringing out a clearer sense of the research process and participants roles. In particular, we will expand on the intreview process and the structuring of questions to participants.

We are also extremely grateful for the specific points (including line numbers) and we will address all of these at the appropriate time.

Many thanks and best wishes,

Ewan
