---

Author comment on "Bayesian age–depth modelling applied to varve and radiometric dating to optimize the transfer of an existing high-resolution chronology to a new composite sediment profile from Holzmaar (West Eifel Volcanic Field, Germany)" by Stella Birlo et al., Geochronology Discuss., <https://doi.org/10.5194/gchron-2022-22-AC2>, 2022

---

CC1 is identical with the second review (RC2). For this reason, please consider the author comment under RC2 as being valid as comment to CC1 as well - thank you.
