Author comment on "Measuring electrical properties of the lower troposphere using enhanced meteorological radiosondes" by R. Giles Harrison, Geosci. Instrum. Method. Data Syst. Discuss., <https://doi.org/10.5194/gi-2021-26-AC2>, 2021

I thank Walter Schmidt for his thorough reading of the manuscript and the helpful comments made, which I will address in a revision. It is most encouraging that the paper was so well received.

It is also interesting to learn that "bespoke" is, unfortunately, a little opaque. I will give it some thought!
