Author comment on "Passive seismic experiment "AniMaLS" in the Polish Sudetes (NE Variscides)" by Monika Bociarska et al., Geosci. Instrum. Method. Data Syst. Discuss., <https://doi.org/10.5194/gi-2021-7-AC3>, 2021

Dear Dr. Geissler,

We are grateful to have received your review which led to important improvements of the manuscript. We carefully addressed all your suggestions. We respond to the comments in detail in the attached supplementary PDF (our responses are in bold font). We also attach a PDF of the corrected manuscript with tracked changes.

Additionally, we enclose a supplementary file with PDF of the original manuscript with your hand-written comments and corrections, subsequently annotated by us. Corrections accepted by us are mostly left unmarked, sometimes they are marked with green and with our comments in speech bubbles to clarify the point. Very few suggestions that we would prefer to decline are marked with dark yellow color, with our comments in speech bubbles in order to explain the reason.

Please also note the supplement to this comment:
