Dears,

this is an excellent paper explaining the soil sanitization in arid and sim arid areas, I advise to publish it after tacking the following mainer comments:

1. Abstract: should present more concrete results as well as propose a solution to the problem.

2. line 72: correction arie to arid
3. line 133- 134: re-write the sentence to include the name of the Kibbutz.
4. line 145: can you be more precise regarding the soil texture
5. line 149: please add the sampling method
6. line 163 through 168: the table presentation should be a lift to the right and the measuring units should be unified
7. line 185: what do you mean by normal irrigation?
8. line 306 and 340: takt?
9. line 505: fig.4 C. - do you mean figure 16 C, please correct it.

Best wishes
