Author comment on "*dh2loop* 1.0: an open-source Python library for automated processing and classification of geological logs" by Ranee Joshi et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2020-391-AC3, 2021

Hi Matt,

Thank you for the constructive suggestions. We have restructured the paper, as you have suggested, to address the feeling of confusion. We tried to reduce the sections that seem to be documentation and removed the appendices to reduce the length. We have taken note of your suggestions for the code and they will addresssed in a future release. Our response to your further comments are detailed in the attached file. Hope you find them in good order.

Please also note the supplement to this comment:
