Author comment on "*dh2loop* 1.0: an open-source Python library for automated processing and classification of geological logs" by Ranee Joshi et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2020-391-AC4>, 2021

Hi Andrew,

We would like to submit the revised version of the paper. Incorporating the reviewer's suggestions, we tried to minimize the text and restructure the paper. I am not sure if I should do the submission here as I get a message that says: "Attention: please do NOT submit your revised manuscript here as supplement". However, I cannot seem to find where I could upload the revised file. Please let me know if I shall be uploading this elsewhere. Thank you.

Please also note the supplement to this comment:
