Author comment on "FABM-NflexPD 1.0: assessing an instantaneous acclimation approach for modeling phytoplankton growth" by Onur Kerimoglu et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2020-396-AC1>, 2021

Dear Editor,

Thank you for your comment. In order to avoid potential confusions, we would not like to perpetuate a version of the model code which may be potentially inconsistent with the final version of the manuscript. However, once the manuscript is accepted for publication, we will establish a version of the code that is fully consistent with the final version of the manuscript and compatible with the latest versions of its dependencies, store it in a suitable repository with a DOI.

Best regards,

Onur Kerimoglu
