Comment on gmd-2020-399

Juan Antonio Añel

Chief editor comment on "Synergy between satellite observations of soil moisture and water storage anomalies for global runoff estimation" by Stefania Camici et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2020-399-CEC1>, 2021

Dear authors,

You can not publish the code of the model after the acceptance of the paper. It must be available during the review process. Therefore, please, make it available in a permanent repository—for example, Zenodo. As soon as you have done it, post a comment to your manuscript, including the model version number and the link to the Zenodo repository and corresponding DOI.

Also, please, in the next step of the review process, be sure that you include the name of the model and the version that you use in the title of the manuscript.

Best regards,

Juan A. Añel
Geosc. Mod. Dev. Executive Editor
