Comment on gmd-2020-423

Astrid Kerkweg

Chief editor comment on "A discrete interaction numerical model for coagulation and fragmentation of marine detritic particulate matter (Coagfrag v.1)" by Gwenaëlle Gremion et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2020-423-CEC1>, 2021

Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.2:

<https://www.geosci-model-dev.net/12/2215/2019/>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the 'Manuscript Types' section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

In particular, please note that for your paper, the following requirement has not been met in the Discussions paper:

- "The main paper must give the model name and version number (or other unique identifier) in the title."

Please add a name and a version number of the model you are publishing here in the title upon your revised submission to GMD. Note, that a name or acronym and version number make your model much easier referencable.

Yours,

Astrid Kerkweg
