Comment on gmd-2020-430

Astrid Kerkweg

Chief editor comment on "Investigating the importance of sub-grid particle formation in point source plumes over eastern China using IAP-AACM v1.0 with a sub-grid parameterization" by Ying Wei et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2020-430-CEC1>, 2021

Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.2:

<https://www.geosci-model-dev.net/12/2215/2019/>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the 'Manuscript Types' section:

http://www.geoscientific-model-development.net/submission/manuscript_types.html

In particular, please note that for your paper, the following requirement has not been met in the Discussions paper:

- "The main paper must give the model name and version number (or other unique identifier) in the title."

Please add the version number of IAP-AACM in the title upon your revised submission to GMD.

Yours,

Astrid Kerkweg
