Author comment on "Plume spreading test case for coastal ocean models" by Vera Fofonova et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2020-438-AC1>, 2021

Dear Editor,

Thank you for the comment. We have created DOIs for the Thetis, GETM and FESOM-C codes used in the current study:

Thetis: <https://doi.org/10.5281/zenodo.4683743> ,

GETM/GOTM: <http://doi.org/10.5281/zenodo.4695259> ,

FESOM-C: <https://doi.org/10.5281/zenodo.4696058> .

The correct link to the FESOM-C v2 version is <https://doi.org/10.5281/zenodo.2085177> .

We promise to include these links to the 'Code and Data availability' during 'response to review' phase. Excuse us for the inconvenience.

Kind regards, Vera on behalf of the authors
