Editor comment on "The EC-Earth3 Earth System Model for the Climate Model Intercomparison Project 6" by Ralf Döscher et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2020-446-EC1>, 2021

Dear Ralf and co-authors,

I am adding an editor comment here solely to satisfy the minimum number of reviewer comments required. This is because one reviewer's comments were not registered as being a review. However, for the purpose of responding to the reviews and submitting a revised manuscript, I ask that you consider both sets of comments.

Regards,

Fiona O'Connor
