Comment on gmd-2021-112

Juan Antonio Añel

Chief editor comment on "Modelling of faults in LoopStructural 1.0" by Lachlan Grose et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-112-CEC1>, 2021

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

The LoopStructural code is archived in GitHub. However, GitHub is not a suitable repository. GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo. Therefore, please, publish in one of the appropriate repositories the version of the code you have used in your manuscript.

In this way, before the Discussions stage is closed, you must reply to this comment with the link to the repository for the code and the corresponding DOI.

Also, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section and the DOI of the code.

Juan A. Añel
