Comment on gmd-2021-120

Laurent Ailleres

Community comment on "A physically-based distributed karst hydrological model (QMG model-V1.0) for flood simulations" by Ji Li et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-120-CC1>, 2021

Dear Author,

Thanks for your contribution and an interesting paper. Although I am not providing a full review, this paper does not fit the special issue under which it appears: The Loop 3D stochastic geological modelling platform – development and applications

This is not a development nor an application of the Loop platform. Please remove your contribution from the Loop special issue.

Thank you and kind regards,

Laurent
