Community comment on "A physically-based distributed karst hydrological model (QMG model-V1.0) for flood simulations" by Ji Li et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2021-120-CC2>, 2021

Dear Laurent,

I am JI LI. Thank you for the information, I may have chosen the wrong special issue at the beginning of the submission, as you say, this is not a development nor an application of the Loop platform, but I would like to know that the manuscript is currently in the GMD open discussions stage and that the reviewers have given their comments and we have responded to them. In this case, how can I remove the manuscript information from this special issue? Does the removal mean that I have to resubmit the paper? Please let me know? Thanks.

Ji Li
