Author comment on "Sensitivity analysis of Ocean Temperature Regressor v1.0; a data-driven model of ocean temperature" by Rachel Furner et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2021-132-AC2, 2021

Dear Juan A. Añel,

Many thanks for your comment and advice, and apologies for this issue. It was picked up by the topical editor, and an amended manuscript uploaded with a suitable zendo link in place of the github link. Somehow though, the original manuscript seems to be the one visible as a preprint, and not this updated version.

The code is available on zenodo, https://zenodo.org/record/4672260, DOI 10.5281/zenodo.4672260, and I have updated the licence info as suggested. I will make sure this is the link given in any future versions of the manuscript.

Apologies again for this,

Rachel
