Reply on RC2 - thank you! Detailed response till 29th of October.

Sandra Hellmers and Peter Fröhle

Author comment on "Computation of backwater effects in surface waters of lowland catchments including control structures – an efficient and re-usable method implemented in the hydrological open-source model Kalypso-NA (4.0)" by Sandra Hellmers and Peter Fröhle, Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-140-AC2>, 2021

Thank you very much for the detailed and well worked out review. Your comments, questions and as well your critical points are very valuable for our revision of the preprint. I will work out a detailed response to your comments in the review till the 29th of October 2021.
