Community comment on "A new methodological framework for geophysical sensor combinations associated with machine learning algorithms to understand soil attributes" by Danilo César de Mello et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2021-153-CC1, 2021

Dear reviewers,

Thank you for your great contributions to our manuscript. I would like to inform you that all requested peer-to-peer corrections are being provided. Thus, as soon as we have the new version, we will submit it to the GMD system with the response letter where all the points pointed out will be clarified in the response letter and added/modified in the original manuscript.

Regards,
