Comment on gmd-2021-167

Juan Antonio Añel

Chief editor comment on "Using neural network ensembles to separate ocean biogeochemical and physical drivers of phytoplankton biogeography in Earth system models" by Christopher Holder et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-167-CEC1>, 2021

Dear authors,

I have checked the 'Code and Data Availability' section of your manuscript, and I would like to request you three minor fixes:

- First, please, add in the mentioned section a statement specific about the availability of data;
- Second, in the Zenodo repository, add a Readme file with an explanation about what is each file;
- Make a clear distinction between input files and output files.

Juan A. Añel
