Comment on gmd-2021-192

Juan Antonio Añel

Chief editor comment on "Globally consistent assessment of economic impacts of wildfires in CLIMADA v2.2" by Samuel Lüthi et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2021-192-CEC1>, 2021

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

The original CLIMADA code is archived only in GitHub (at least other repository is not linked in the manuscript). However, GitHub is not a suitable repository. GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo. Therefore, please, publish the original CLIMADA code in one of the appropriate repositories. In this way, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section, and the DOI of the code.

Also, it would be good if you reply to this comment with the fixed issue before the end of the Discussions stage for your manuscript.

Juan A. Añel
Geosc. Mod. Dev. Exec. Editor
