Author comment on "ENSO-ASC 1.0.0: ENSO deep learning forecast model with a multivariate air–sea coupler" by Bin Mu et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2021-213-AC2, 2021

Dear Juan A. Añel,

Thank you very much for your professional comments concerning our manuscript. Those comments are all very important and valuable for improving our manuscript, we have updated the model/data repository and related statements in the manuscript as your suggestion. The detailed point-by-point responses are presented in the attachment.

On behalf of all the co-authors, best regards,

Bo Qin
