Invitation to proceed with response and revisions

Andrew Wickert (Editor)

Editor comment on "SELF v1.0: a minimal physical model for predicting time of freeze-up in lakes" by Marco Toffolon et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2021-234-EC1>, 2021

Following the initial positive manuscript reviews, I would invite the authors to begin preparing their response to the referee comments as well as revisions to their article.
