Author comment on "uDALES 1.0: a large-eddy simulation model for urban environments" by Ivo Suter et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2021-255-AC3, 2022

We used the section numbering from the discussion manuscript in the previous reply. The corresponding sections in the resubmitted manuscript are:

'2.2 Immersed boundary method' -> '2.3 Immersed boundary method'
'2.4.1 Wall-functions for momentum and temperature' -> '2.5.1 Wall-functions for momentum and temperature'
