Comment on gmd-2021-255

Renate Forkel

Community comment on "uDALES 1.0: a large-eddy simulation model for urban environments" by Ivo Suter et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2021-255-CC1>, 2022

I would like to congratulate the authors on their excellent work. Just a minor comment on the introduction of the paper: The references to Maronga et al. (2015) and Resler et al. (2017) could eventually be replaced by the more recent references Maronga et al, 2020 (<https://doi.org/10.5194/gmd-13-1335-2020>) and Resler et al, 2021 (<https://doi.org/10.5194/gmd-14-4797-2021>) .
