Comment on gmd-2021-266

Juan Antonio Añel (Editor)

Editor comment on "CycloneDetector (v1.0) – Algorithm for detecting cyclone and anticyclone centers from mean sea level pressure layer" by Martin Prantl et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-266-EC1>, 2021

Dear authors,

After receiving the comments from the reviewers, I do not support the submission of a reviewed version of your manuscript. My decision is to reject it for publication in Geosc. Mod. Dev.

I hope that you understand the rationale for the decision in this case. We are happy of continuing to receive your research works for publication in our journal in the future.

Yours sincerely,

Juan A. Añel

Geosc. Mod. Dev. Executive Editor
