Author comment on "Tree hydrodynamic modelling of the soil–plant–atmosphere
continuum using FETCH3" by Marcela Silva et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2021-270-AC1>, 2021

Dear Editor,
Here is the link to the repository for the code and the corresponding
DOI: <https://doi.org/10.5281/zenodo.5567861>. The model's code is now under GNU
General Public License v3.0 or later.
We will include the new repository doi in the revised version of our manuscript, under the
'Code and Data Availability' section. Further developments in the code will be added
creating a new version, if necessary.
Please, let us know if this complies with the Code and Data Policy of GMD.

Thank you,

Marcela
