Comment on gmd-2021-281

Juan Antonio Añel

Chief editor comment on "WIFF1.0: a hybrid machine-learning-based parameterization of wave-induced sea ice floe fracture" by Christopher Horvat and Lettie A. Roach, Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2021-281-CEC1, 2021

Dear authors,

Checking your manuscript, I have seen that you have done a good job making the relevant data available in Zenodo. However, you have archived your code in GitHub. However, GitHub is not a suitable repository. GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo. Therefore, please, publish your code in one of the appropriate repositories.
In this way, before the Discussions stage is closed, you must reply to this comment with the link to the repository for the code and the corresponding DOI. Also, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section and the DOI of the code.
