Author comment on "Modeling sensitivities of BVOCs to different versions of MEGAN emission schemes in WRF-Chem (v3.6) and its impacts over eastern China" by Mingshuai Zhang et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-29-AC1>, 2021

Editor's General comments:

- Please make your modified WRF-Chem version available in a long-term and trustful repository, as requested in our editorial policy.

Dear Editor,

Thank you for your comment and suggestion.

We uploaded the code to github and generated DOI through zenodo. We will correct the statement of data availability in the manuscript as "The code of updated USTC version of WRF-Chem is available at <https://doi.org/10.5281/zenodo.4663508>".

On behalf of my co-authors,

Mingshuai Zhang
