Comment on gmd-2021-296

Juan Antonio Añel

Chief editor comment on "Islet: interpolation semi-Lagrangian element-based transport" by Andrew M. Bradley et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2021-296-CEC1, 2021

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html You have archived your code in GitHub. However, GitHub is not a suitable repository. GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo. Therefore, please, publish your code in one of the appropriate repositories. These repositories must be available for the review process, as preliminary versions are equally relevant as final ones.

You must reply to this comment, including the link to the repositories and DOIs. Also, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section.

Please, note that in the current version of the manuscript, one of the hyperlinks to one of the GitHub repositories is broken.

Juan A. Añel

Geosc. Mod. Dev. Executive Editor
