Comment on gmd-2021-304

Stefan Kruse et al.

Author comment on "Novel coupled permafrost–forest model (LAVESI–CryoGrid v1.0) revealing the interplay between permafrost, vegetation, and climate across eastern Siberia" by Stefan Kruse et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2021-304-AC1>, 2022

We thank all reviewers for their critical comments and suggestions that led to an improved version of the manuscript. Please find attached as supplement our point-by-point response to the executive editor comment of Astrid Kerkweg and the two reviewer comments in bold font.

Thank you for handling our manuscript submission and considering the manuscript for final publication.

Kind regards,
Stefan Kruse
