Comment on gmd-2021-315

Astrid Kerkweg

Chief editor comment on "PARASO, a circum-Antarctic fully coupled ice-sheet–ocean–sea-ice–atmosphere–land model involving f.ETISH1.7, NEMO3.6, LIM3.6, COSMO5.0 and CLM4.5" by Charles Pelletier et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-315-CEC1>, 2021

Dear authors,

thank you for making the source code available in the largest possible extent. However, in the preprints code availability section there is still the placeholder "tarball numberXXX". Please exchange this by the actual name (and path) in the CLM-Community redmine system, upon revision of your article. Additionally, provide this information already now in an authors comment.

Best regards,

Astrid Kerkweg
