Comment on gmd-2021-332

Juan Antonio Añel

Chief editor comment on "Implementation of a new crop and irrigation scheme in the ISBA land surface model using SURFEX_v8.1" by Arsène Druel et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-332-CEC1>, 2021

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

You have archived your code in GitHub and a repository that does not comply with our requirements (umr-cnrm.fr). However, neither of them are suitable repositories. GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo. Therefore, please, publish your code in one of the appropriate repositories.

In this way, before the Discussions stage is closed, you must reply to this comment with the link to the repository for the code and the corresponding DOI. Also, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section and the DOI of the code.

Two additional issues that you must fix are:

- You say in the manuscript that ISBA version 9.0 is scheduled for release by 2020. This seems to be a mistake.
- The title of your manuscript does not include the version of ISBA that you use. According to our guidelines, you must specify it.

Please, reply as soon as possible to this comment with the link for it so that it is available for the peer-review process, as it should be.

Best regards,

Juan A. Añel

Geosc. Mod. Dev. Executive Editor
