Author comment on "An automatic lake-model application using near-real-time data forcing: development of an operational forecast workflow (COASTLINES) for Lake Erie" by Shuqi Lin et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-34-AC2>, 2021

Hi Dr. Tokuda,

thank you for taking the time to review our manuscript, and your comments are very supportive of our work. Please see our reply in the attachment.

We have made some modifications in the manuscript and hope that can address your concerns.

Regards,

Shuqi Lin and co-authors
