Author comment on "Impact of changes in climate and CO₂ on the carbon storage potential of vegetation under limited water availability using SEIB-DGVM version 3.02" by Shanlin Tong et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-383-AC1>, 2021

Dear Dr Juan A. Añel,

Thanks for your suggestions, I have upload the code of SEIB-DGVM V3.02 in the Zenodo. Meanwhile, the reconstructed CO₂ dataset, EMDI, MOD17A3, and MCD12C1 data, which are the final files used in my work, are archived in the Zenodo. The DOI is [10.5281/zenodo.5811832](https://doi.org/10.5281/zenodo.5811832)

Regards,

Ph.D Tong Shanlin
