## Comment on gmd-2021-386

Juan Antonio Añel

---

Chief editor comment on "Effects of point source emission heights in WRF–STILT: a step towards exploiting nocturnal observations in models" by Fabian Maier et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-386-CEC1>, 2021

---

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

[https://www.geoscientific-model-development.net/policies/code\\_and\\_data\\_policy.html](https://www.geoscientific-model-development.net/policies/code_and_data_policy.html)

You have archived your code in a repository that complies with our trustable permanent archival policy. Therefore, please publish your code in one of the appropriate repositories according to our policy. We can not accept embargoes such as registration or previous contact with the authors.

In this way, you must reply to this comment with the link to the repository used in your manuscript, with its DOI. We understand that some files used in your study are large (e.g., full output from models). In such cases, instead of storing the complete files, you should at least keep the variables or final fields computed and used in your work.

Also, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section and the DOI of the code. Also, I have not seen a license listed in the SVN repository or web page of your code. If you do not include a license, the code continues to be your property and can not be used by others, despite any statement on being free to use. Therefore, when uploading the model's code to the repository, you could want to choose a free software/open-source (FLOSS) license. We recommend the GPLv3. You only need to include the file

'<https://www.gnu.org/licenses/gpl-3.0.txt>' as LICENSE.txt with your code. Also, you can choose other options that Zenodo provides: GPLv2, Apache License, MIT License, etc. Please, reply as soon as possible to this comment with the link for it so that it is available for the peer-review process, as it must be.

Dr. Juan A. Añel

Geosc. Mod. Dev. Executive Editor
